This is not an offer to sell, or solicitation of offers to buy, the condominium unit in state where any of the solicitations contained herein. This offering is made only by the offering documents for the condominium and no statement should be relied upon if not made in the offering documents. Stated dimensions are measured to the exterior boundaries of the exterior walls and the centerline of the exterior walls and the fact that the dimensions that should be determined to comply with the description and definition of the "Unit" and the "Common Area" are primarily only for the purpose of separating the perimeter walls and exclusive interior structural components. For your information, the sales of the U.S.D. determined in accordance with these defined wall boundaries, is 8,823 sq. ft. Notes that measurements of rooms set forth on this floor plan are generally taken at the greatest points of each given room; if the room were a perfect rectangle, without regard for any cuts, protrusions, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. All dimensions are approximate and will vary for any construction, and all floor areas are approximate.

 This is not an offer to sell, or solicitation of offers to buy, the condominium units in sales where such offer or solicitation is made in the offering made only by the offering documents for the condominium and no statement should be relied upon if not made in the offering documents. Spatial dimensions are measured to the exterior boundaries of the defined walls and the perimeter of the interior walls and floor slabs of the unit. Dimensions that would be determined by visiting the project and publication of the "true" facts in the offering documents generally only include the minor variations between the perimeter walls and excludes interior structural components. For your reference, the area of the Unit, determined as described above and divided by boundaries, is 7,456 sq. ft. These measurements of rooms and lot for this floor plan are generally based on the greatest part of each given room. If any floors were a perfect rectangle, without regard for any columns, corridors, etc., the area of the lot and the product obtained by multiplying the values length times width, all dimensions are approximate and may vary with the construction, and all floor plans and development plans are subject to change.
